Opening of our new office in Sankt Petersburg

ECL's subsidiary "OOO ECL Rus"

On 11 November 2015 we opened our new office in the Russian city of St. Petersburg with a reception for customers and business partners.

We were absolutely delighted with the great interest shown at our opening event for the newly established subsidiary "OOO ECL Rus". The large number of guests and visitors from the world of business and politics was really overwhelming.

The Major of the Hanseatic City of Lübeck, Bernd Saxe, travelled to Russia especially for the opening ceremony. The Vice Chairman of the Committee for Foreign Relations in St. Petersburg, Igor Lonskij, and the Deputy Consul General of the Consulate General of the Federal Republic of Germany in St. Petersburg, Katrin Werdermann, attended as well.

The newly founded holding company "OOO ECL Rus" is managed by Dmytro Grybkov. Dmytro Grybkov has started his carrier at ECL in Lübeck as trainee and has been in charge of business with Russia at ECL since 2009.

Strong and efficient support for the operational of the orders placed by our Russian customers will be provided by Oliver Berg (left side on photo) from our Lübeck office together with his team Eugen Bitz, Arthur Petrosyan and Frank Zielske.

We wish the Russian team every success and hope they enjoy their work.

New intermodal link between Lübeck and Karlsruhe

Baden Shuttle started in October

Our new intermodal service "Baden Shuttle" connects Lübeck-Travemünde with Karlsruhe. The "Baden Shuttle" operates three times per week in each direction between the metropolis of the Rhine and Baltic Sea.

The "Baden Shuttle" offers attractive lead times with departures and arrivals optimally adapted to the needs of carriers and freight forwarders. The schedule for the "Baden Shuttle" is planned to fit in with routing via Lübeck to and from Sweden, Finland and Russia as well as the Baltic States and facilitates the ideal accessibility of consignors and consignees in short and long distance transport. We operate these block trains available for trailers, containers and swap bodies by support of the DUSS terminal in Karlsruhe and terminal "Baltic Rail Gate" at the Skandinavienkai in Lübeck-Travemünde.

Save time, costs and nerves and do your European intermodal one-stop-booking with ECL's intermodal services - we care!

ECL-sister now distribution partner for "tomlift"

Make your trailer craneable and fit for Intermodal transport

Our sister company Skandic Service GmbH (SSG) has recently become distribution partner for "tomlift".

"tomlift", produced and developed by "Transport Innovation GmbH", is a retrofit package suitable for all semi-trailers. The complete kit is approved by the German TÜV, is ISO-/CE certified and can be removed anytime for reuse on other semi-trailers.

You can purchase "tomlift" via our sister company SSG with possibility for installation in Lübeck-Travemünde.

Apprenticeship at ECL

Rostock: Start to vocational training

We welcome a new apprentice to our branch in Rostock. Adrian Berndt (photo left side) started his vocational training on 1st September 2015. We wish Adrian success and enjoyment during his vocational training period at ECL.

Lübeck: decoration of the Xmas tree

Christmas season has just begun! Every year our apprentices in the first year of apprenticeship decorate our Christmas tree in the entrance area of our office in Lübeck. This long tradition is a very popular task for our youngest colleagues and has always been done with loving care.

ECL and Green Cargo enter into an intermodal cooperation

A milestone in our intermodal services

ECL and the Swedish railway company Green Cargo have agreed to cooperate in the intermodal sector by connecting Malmö, Trelleborg and Lübeck. By linking our intermodal connections, we are setting a milestone in the development of our transport services.

Green Cargo is the leading Swedish rail freight company with more than 40 intermodal terminal locations in Sweden and Norway. Together with our intermodal links to/from several destinations in Germany as well as to/from Luxembourg, France, Spain and Italy, this cooperation will provide customers with access to seamless transports through Europe. Under the premise of reducing CO2 emissions, it will be possible to move trailer, containers or swap bodies from road to rail up to 2,500 km.

All of the international connections offered under this cooperation agreement can be booked directly via ECL for the entire route, including cross border connections and ferry links.
